BASE BID DESCRIPTION:

The Taxiway F Pavement Rehabilitation & Replacement project consists of pavement work on Taxiway F between Runway 13-31 and Taxiway Z at General Mitchell International Airport (GMIA) in Milwaukee, WI. This project consists of full depth Portland Cement Concrete (PCC) replacement and the repair and replacement of impacted utilities such as storm sewers, manholes and lighting. The existing taxiway geometry will remain essentially the same, with some minor adjustments in width to provide continuity along the length of the taxiway.

CBDP concurs with the DBE participation for the above recommended Bid. Please refer to the approved Form DBD-014C attached to the bid recommendation.
